

ECO ACTIVITY OF THE WEEK:

Be wild about
wildflowers

Now we are well into spring there is more of a need to get outside and enjoy the open space and outdoors. Whilst in your garden or out on a walk, see if you can spot any wildflowers. Wildflowers must be protected to ensure that their species continue to grow and decorate our countryside as well as allowing our bees to pollinate.

For a list of the most common wildflowers found in the UK, visit the Woodland Trust website or follow this link

<https://www.woodlandtrust.org.uk/trees-woods-and-wildlife/plants/wild-flowers/>

Why not create your own list of all the wildflower species that you have seen or even leave a patch of grass on your lawn uncut and plant some wildflower seeds of your own. Please take photos of yourself taking part in this ECO activity to share with us at school.

Have fun,

Mrs Disley (ECO-coordinator)
