

ECO ACTIVITY OF THE WEEK:

Biodiversity-building a Mini-beast hotel

Over the Easter break, I thought it would be nice for you to create a mini-beast hotel full of different natural materials, to provide hidey-holes for creatures galore! The materials you have available, and your imagination only limit the size and construction of your bug hotel! You can use old house bricks, hollow bamboo canes, pallets or pieces of wood, pinecones, old terracotta plant pots, dry leaves, soil, moss and straw.

Mini beasts are very relaxed tenants and will find the places that appeal to them as long as there are lots of nice nooks and crannies to explore and some nice rotting bark to munch on.

For a step-by-step guide, visit the RSPB website.

Please take photos of yourself taking part in this ECO activity to share with us at school.

Have fun,

Mrs Disley (ECO-coordinator)
